

Help Us Restore This Critical Habitat for Birds

Orange Audubon Nature Center at the Apopka Birding Park

Opening Fall 2025

Orange Audubon, the Central Florida chapter of the National Audubon Society, has begun work on a nature center and birding park at the entrance to the popular Lake Apopka Wildlife Drive on the north shore of the lake. The restoration project and long-term lease agreement

with the City of Apopka was announced in March 2024 by the City. Orange Audubon will convert an abandoned building on Lust Road into a low-carbon, sustainability-focused educational visitor’s center with surrounding habitat of native plants, birdwatching observation sites, and walking trails.

The architectural firm Little Diversified Architectural Consulting is working on design of a state-of-the art energy-efficient building. Originally 2400 square feet, it will be expanded to 3400 square feet and will cost approximately \$1.5 million. Orange Audubon hopes to begin construction this January 2025. We need your help with volunteer manpower, ideas, and funding.

Some specific needs are:

\$350,000 for Birding Observatory/Annex with direct views into the east bird habitats
\$250,000 for flexible educational classroom and meeting space
\$100,000 for the solar array (or individual panels -\$500 each)
\$100,000 for exterior birding porches
\$45,000 for educational displays
\$20,000 for fencing
\$10,000 for water cisterns, \$2,500 for a water feature
Smaller donations for native plants, bird feeding stations, a chimney swift tower, bat houses, Purple Martin house, raptor poles, benches, bird blinds and gardening/mowing tools

Your tax-deductable donation will be prominently recognized. Please email info@orangeaudubonfl.org or treasurer@orangeaudubonfl.org or call 407-637-2525 to begin the conversation. Thank you!
